

# WHY AND HOW TO HIDE WORDPRESS LOGIN URL FOR SECURITY

# WHY HIDE THE LOGIN URL?

Hackers often target the default WordPress login page. Securing it reduces risk.

# HOW TO HIDE THE LOGIN URL MANUALLY

Follow these steps to  
ensure WordPress  
login URL manually

# HIDE THE LOGIN URL MANNUALLY

Find the main login file in your WordPress installation.

Create a copy of the file and rename it to something unique. Open the renamed file and replace all instances of the old file name with the new one.

Remove the original login file from the folder.

# HIDE LOGIN URL THROUGH PLUGIN

You can also hide login  
URL through WordPress  
plugins such as;

1. WPS login
2. Easy hide login
3. Rename wp-admin login

# ADDITIONAL SECURITY TIP

Limit login attempts and  
enable two-factor  
authentication for extra  
protection.
